

For Concrete/Steel Surface Application

Shot Blaster

KBF270

Self-propelled Horizontal Movable Blaster

BASIC SPECIFICATION

Working width: 270mm
Blasting capacity: 30 to 50 sq. meters/h on steel
200 sq. meters/h on concrete
Motor power: 11 kw
Weight: 380kgs
Packing size: 1600mm×431mm×1016mm
Abrasive consumption: <200 gr/m²

STEEL SURFACE

- ◆ Removes paint, rust, mill scale, and marine growth for comprehensive surface preparation.
- ◆ Cleans ship and aircraft carrier decks, ensuring optimal safety and functionality.
- ◆ Removes nonskid coatings for enhanced traction and performance.
- ◆ Cleans offshore platforms, maintaining structural integrity and safety standards.
- ◆ Prepares petroleum and water storage tank surfaces for optimal storage and longevity.

For Concrete/Steel Surface Application

Shot Blaster

KBF350

Self-propelled Horizontal Movable Blaster

BASIC SPECIFICATION

Working width: 350mm
Blasting capacity: 50 to 80 sq. meters/h on steel
350 sq. meters/h on concrete
Motor power: 15 kw
Weight: 450kgs
Packing size: 1803mm×584mm×1190mm
Abrasive consumption: <300 gr/m²

STEEL SURFACE

- ◆ Removes paint, rust, mill scale, and marine growth for comprehensive surface preparation.
- ◆ Cleans ship and aircraft carrier decks, ensuring optimal safety and functionality.
- ◆ Removes nonskid coatings for enhanced traction and performance.
- ◆ Cleans offshore platforms, maintaining structural integrity and safety standards.
- ◆ Prepares petroleum and water storage tank surfaces for optimal storage and longevity.

For Concrete/Steel Surface Application

Shot Blaster

KBF550

Self-propelled Horizontal Movable Blaster

BASIC SPECIFICATION

Working width: 550mm
Blasting capacity: 80 to 120 sq. meters/h on steel
550 sq. meters/h on concrete
Motor power: 2×11 kw
Weight: 580kgs
Packing size: 1960mm×720mm×1400mm
Abrasive consumption: <550 gr/m²

STEEL SURFACE

- ◆ Removes paint, rust, mill scale, and marine growth for comprehensive surface preparation.
- ◆ Cleans ship and aircraft carrier decks, ensuring optimal safety and functionality.
- ◆ Removes nonskid coatings for enhanced traction and performance.
- ◆ Cleans offshore platforms, maintaining structural integrity and safety standards.
- ◆ Prepares petroleum and water storage tank surfaces for optimal storage and longevity.

For Concrete/Steel Surface Application

Shot Blaster

KBF800

Self-propelled Horizontal Movable Blaster

BASIC SPECIFICATION

Working width: 800mm
Blasting capacity: 120 to 180 sq. meters/h on steel
750 sq. meters/h on concrete
Motor power: 2×15kw
Weight: 720kgs
Packing size: 1905mm×990mm×1220mm
Abrasive consumption: <800 gr/m²

STEEL SURFACE

- ◆ Removes paint, rust, mill scale, and marine growth for comprehensive surface preparation.
- ◆ Cleans ship and aircraft carrier decks, ensuring optimal safety and functionality.
- ◆ Removes nonskid coatings for enhanced traction and performance.
- ◆ Cleans offshore platforms, maintaining structural integrity and safety standards.
- ◆ Prepares petroleum and water storage tank surfaces for optimal storage and longevity.

For Concrete/Steel Surface Application

Shot Blaster KBF1000

Self-propelled Horizontal Movable Blaster

BASIC SPECIFICATION

Working width: 1000mm
Blasting capacity: 140 to 210 sq. meters/h on steel
900 sq. meters/h on concrete
Motor power: 2×18.5 kw
Weight: 950kgs
Packing size: 2100mm×1100mm×1300mm
Abrasive consumption: <1200 gr/m²

STEEL SURFACE

- ◆ Removes paint, rust, mill scale, and marine growth for comprehensive surface preparation.
- ◆ Cleans ship and aircraft carrier decks, ensuring optimal safety and functionality.
- ◆ Removes nonskid coatings for enhanced traction and performance.
- ◆ Cleans offshore platforms, maintaining structural integrity and safety standards.
- ◆ Prepares petroleum and water storage tank surfaces for optimal storage and longevity.
